## CAPHC 2008 – 2013: A Snapshot of National Programs & Opportunities

**Elaine Orrbine**

President & CEO

Canadian Association of Paediatric Health Centres (CAPHC)

# CAPHC's Guiding Principles...

- Based on the understanding that relevance, timeliness and good working relationships are critical factors for success...
- CAPHC has strived to build a foundation for long-term collaborations in key health service delivery areas, on behalf of our member organizations,
- Success over the next five years will be measured by CAPHC's ability to work with our partner organizations in achieving consensus on a National Health Service delivery agenda for children and youth

## CAPHC's Guiding Principles ...

- It is essential to highlight that the driving force behind all CAPHC national programs comes from the expertise and leadership of many multidisciplinary health professionals from coast to coast who contribute and participate in CAPHC's many national working groups and collaboratives;
- Going forward, CAPHC will continue to be flexible and to scan the environment for emerging issues; consult with its constituency regarding its needs; and seek new partnerships to enhance current initiatives and develop new programs to advance child and youth health service delivery.

# CAPHC's Organizational Goals 2008 - 2013

- CAPHC's strategic directions and priorities for the next five years will be organized within the following four overarching organizational goals.
- Each organizational goal will be addressed through specific activities and implemented through CAPHC's continued work in following priority theme areas:
  - Child Health Promotion and Illness Prevention across the Continuum;
  - Patient Safety & Quality Improvement;
  - Advancing Child & Youth Health Agendas; and
  - Knowledge Brokering and Advocacy.

# Guided by our membership, specific activities will focus on ...

- Data Sharing & Benchmarking;
- Developing Child and Youth Population Standards;
- Quality Improvement and Patient Safety;
- Continuity & Coordination of Care;
- Equity & Timely Access to Services;
- Networking & Connectivity - key linkages & partnerships focused on current and emerging child and youth health service delivery issues; and
- Knowledge brokering and Knowledge Translation
