

CAPHC Multi-Stakeholder National Patient Safety Workshop

Sunday, November 7, 2004

8:00am – 12:30pm

Mackenzie Room, Fairmont Queen Elizabeth Hotel

Montreal, Quebec

Patient safety is one of CAPHC's national priorities. On behalf its members, CAPHC has been working throughout the past year to facilitate collaboration between the Association and our Federal Agencies and Organizations to address current and emerging patient safety issues specific to child and youth health.

This pre-conference workshop, builds on the consultative process that was initiated between Health Canada and members of CAPHC, during a one-day workshop held in Calgary, Alberta in conjunction with CAPHC's 2003 Annual Meeting. The purpose of this first workshop was to engage key stakeholders from across the country to address important issues surrounding patient safety.

The purpose of this multi-stakeholder workshop will be to:

- Introduce participants to the new Canadian Patient Safety Institute (CPSI) and hear about how child and youth related issues can be built into CPSI's national strategic planning process;
- Learn more about the Canadian Medication Incident Reporting and Prevention System (CMIRPS) and how it has evolved as an independent, multi-disciplinary initiative closely aligned with the objectives of the Canadian Patient Safety Institute.
- Discuss the results of CAPHC's National Survey of Patient Safety Practices in Child and Youth Health Centres and related organizations across Canada and
- Initiate the development of a National Patient Safety Research Agenda.
